1. Please review the 17" FCDT offer price of \$49.5 for SDI (500cd/85khz) as follows.
Currently, it is being applied for the Chinese domestic bound only, and it maybe further considered for other models such as CIS (70/85KHZ), we are experiencing great difficulties in further lowering the price.
Please give us your opinion at NT. (within today, 26th)
2. Dear Manager Young-taek Lee,
Please go with \$49.5 for the SDI 500cd.
Since the SDI is saying that the market price is a reduced price compared to 4Q of '04,
Please negotiate with SDI using below price

Fyi, DI has decided to go ahead with 19" FCDT P-P

Dear Group leader,

Here is a report on the meeting result with SDI CDT Sales Team.

1. Date: 1/25(Tue) 11:00~12:00]
2. Location: Fast 3 conference room
3. Attendees
 - SDI : Senior Manager Eui-seop Cho, Associate Ji-woon Jung (CDT Sales Team)
 - LGE: General Manager Geun-jik Park, drafter, Associate Dong-woo Ryu (Strategic Procurement Group)
4. Main discussions
 - (1) 17" FCDT

1) Current *Biz* status

- Currently supplying *LGENT 500cd 85khz* 1.0K/month (*From SDI Korea*)
- Currently, the development of model has been completed for Chinese domestic market only; *SDI* is requesting to *Volume-up* with *Brand* models for other regions.

2) Price status

- *LPD(Q1)* : \$ 47.0 (Based on *ITC* arrival price)
- Current supply price for *SDI*: \$ 51.5 (Based on *ITC* arrival price)
- Regarding 1), in order to adopt *SDI's CDT*, current prices need to go *Down*, specially in the case of *NT*, it is experiencing difficulties due to the *CIS* selling price reduction; in case *SDI CDT* is used, additional profit loss will occur because their price is higher than *LPD* that it needs to be able to *Meet* the *LPD* price for volume increase.

☞ *SDI's* presented price : \$ 49.5

: Overall trend of industry for *Q1* is [price] reduction of \$1.5~2 compared to December '04; it is quite difficult to manage prices considering factors such as *LPD/SEC*, etc.

3) Discussed items

- Will discuss with *NT* about going with *SDI*; *SDI* also requested to present 2nd price by 1/26

4) The drafter's opinion

- Currently, *SDI 17"FCDT 85KHZ* model is being supplied by *SDI Korea*; even if the volume for *NT* goes *UP*, there is no logistical advantages because the plan is to produce them at *SDI Tianjin*
- It looks like the immediate adoption to *NT* seems unlikely due to the *Gap* between the *LPD* price and *SDI's* offered price, but *Push* to reduce the *Gap* will continue.

(2) 19"FCDT

1) Current *Biz* status

- *LGENT E/S* has been completed; price negotiation for *LGEDI P-P* (40 units) is underway

2) Price status

- *LPD(Q1)* : \$ 68.0 (Based on *Semi-ITC* arrival price)
- *SDI's* presented price: \$ 70.0 (Based on *ITC* arrival price)

3) The drafter's opinion

- Compared to *LPD* price, there is \$1.0 difference based on *ITC*, but price needs to be renegotiated at the time of *M-P*, after proceeding with *P-P* first.

(3) Procurement Team Leaders' introductory meeting (VP Sang-kyu Park, *SDI CDT* Sales Team)

- When the schedule is coordinated with *SDI CPT* Sales, same date is preferred.

(4) Other

- *SDI* Sales is asking such teams as *SDI Development* to develop *Slim CDT* by the end of '05.

(5) Post meeting opinion

- [I] was able to sense that *SDI* is strongly hoping to expand the *BIZ* with *LGE*,
- *LGE* also needs to pull in *SDI* as the 2nd, but it is quite difficult to *Biz start* due to the price *Gap* with *LPD*.
- *SDI* pitched the possibility of *Meeting* the price by means of *A/S*, etc. once the volume goes *UP*, after [we] first go ahead with it.
- We plan to have a discussion with *LGENT/LGEDI* procurement about price negotiation issues regarding

17"FCDT/19"FCDTSDI.

Report is hereby submitted.

1. 하기와 같이 17"FCDT SDI 제시 가격(500cd/85khz) \$ 49.5에 대하여 검토를 요청드립니다.
현재 중국 내수향으로만 일부 적용중이나, CIS등 기타 모델(70/85KHZ)에 검토할 수도 있습니다만,
추가 가격 인하에 어려움이 많습니다.
NT의 의견 요청드립니다.(금일 26일 중)
2. 이영택과장님
2월부터는 SDI 500cd를 \$49.5로 진행바랍니다.
SDI에서 시장 가격이 '04년 4Q 대비 인화된 가격이라 하므로
하기 가격으로 SDI와 협의 바랍니다.

참고로 DI에서는 19"FCDT P-P 진행기로 하였습니다.

- LPD(1Q) : \$ 47.0 (ITC 도착가 기준)
- SDI 현 공급가격: \$ 51.5 (ITC 도착가 기준)
- 1)번 관련 SDI CDT 채용을 위해서는 현 공급 가격 Down이 필요하며, 특히 NT의 경우 CIS 판가 하락으로 어려움을 겪고 있으며, LPD 대비 가격이 높은 SDI CDT 사용시 추가 손익 악화 발생됨으로 LPD 수준 가격 Meet되어야 증량 가능

☞ SDI 제시 가격: \$ 49.5

: '04년 12월 대비 1Q 업계 전반적으로 \$ 1.5~2 인하되는 추세이며, LPD/SEC등 고려시 가격 운용에 어려움이 많음

(3) 구매팀장 상견례(SDI CDT 영업팀 박상규 상무)

- SDI CPT영업과 일정 확정시 동일 일자 진행 희망

(4) 기타

- SDI영업에서는 SDI 개발등에 '05년 연말까지 Slim CDT 개발을 요청하고 있음

(5) 상담 소감

- SDI에서 LGE와의 BIZ 확대를 강력히 희망하고 있음을 감지할 수 있으며
- LGE도 SDI를 2nd로 끌고 가야 하나, LPD 대비 가격 Gap으로 인하여 Biz start에 어려움이 많음

 Cc: Manager Seong Cheol Han

Thank you for your cooperation.

During the last meeting with SDI, we had a price discussion on 85KHZ but the difference in opinions was not narrowed due to difference of \$2.5 relative to LPD's price.
 As to 500cd (T730BHPL, T730PUPL) for the domestic consumption in China applied at NT, it was agreed to lower price by \$1.5 relative to December.

The Division's Strategic Procurement plans on expanding SDI. Therefore, we would like to request you review the following development and application thereof, as stated below:

1. Development CDT SPEC: SDI 17" FCDT high luminance tube 70Khz (impedance: 0.18mH)
2. Requested: Develop a 17" FCDT Chassis 0.18mH model
3. Applicable model: NT mass production BRAND (CIS/China)
4. SDI production site: SDI Tianjin plant

Please review and reply.

When applied, we will have a price discussion on the logistics costs, SPEC DOWN, etc.

Thank you.

Doesn't seem like there would be much merit from the perspective of shared use of chassis....
 Gen. Mgr. Seung Man Lee and Supervisor Hyuk Dong Kim, please contemplate this matter.

Gen. Mgr.,

Greetings.

As described below, SDI is requesting for review on development of 17" FCDT 70Khz.
LPD's standard is 85Khz and will go for development of 500cd and ez Green.
It appears unnecessary to separately develop Samsung 70Khz, but
please advise.

The opinion of Procurement in the Business Division is that, if the price for current 85khz (0.13) 500cd is set at the level of LPD, we may approach that a discussion on further volume is possible.
Please share your opinion, Gen. Mgr.

Thank you.

From: Associate Ji Woon Jeong, CDT Sales Team, SDI

Greetings. This is Ji Woon Jeong at CDT Sales Team, SDI.

With respect to the issues associated with SDI CDT Sales Team's visit to LG Gumi next week, I would like to share with you what has been confirmed so far. Please refer to below.

- Below -

☐ Samsung SDI's schedule to visit LGE

1. Date and time: Tuesday, January 25, 11:00
2. Visitors: Sr. Mgr. Eui Seop Cho and Associate Ji Woon Jeong at CDT Sales Team, SDI
3. Purpose of the Visit

- 1) Discuss the current issues associated with SDI 15", 17" and 19"
- 2) Top meeting of Procurement Team Leader at LG and CDT Sales Team Leader at SDI

4. Request

Mgr. Mr. Ryu, Please register the visitors and reserve a conference room.

☐ Issues associated with 17" high luminance tube

- LGE request: It is difficult to increase SDI product volume due to the price issue.

- SDI's position: Currently, the product used by LGE is 17" high luminance tube 85khz (impedance: 0.13mH) model (high-end model). But if SDI's 17" high luminance 70khz (impedance: 0.18mH) model (general model) is used, price burden can be decreased.
(SDI request: development of LGE 17" chassis 0.18mH model development)

- Future plan: A request is made that the specific pricing for 17" high luminance tube 70khz be discussed during the meeting next Tuesday.

* Further discussion about 15" TILT COIL is necessary.

(As it was mentioned to you over the phone, the VE effect seems difficult with respect to LPD prices as well as with what was checked with the engineer part.)

업무 협조에 감사드립니다.

다름아니라,
 지난번 SDI와의 미팅시 85KHZ 가격 협의를 하였으나
 LPD 가격 대비 \$ 2.5 차이로 이견을 좁히지 못하였고
 현재 NT에서 적용중인 중국 내수향 500cd
 (T730BHPL, T730PUPL)에 대해서는 12월 대비
 \$ 1.5 인하하기로 하였습니다.

사업부 구매 전략은 SDI 확대를 하고자 하며,
 하기와 같이 SDI 70KHZ 개발하여 적용을 검토 요청드립니다.

1. 개발 CDT SPEC: SDI 17"FCDT 고휘고관 70khz(임피던스 0.18 mH)
2. 요청 사항: 17"FCDT Chassis 0.18 mH 모델 개발
3. 적용모델: NT 양산 BRAND(CIS/중국)
4. SDI 생산지: SDI 천진 공장

검토후 회신 요청드립니다.
 적용시 물류 비용/SPEC DOWN등으로 가격 협의 진행
 예정입니다.

감사합니다.

부장님

안녕하세요

하기와 같이 SDI에서 17"FCDT 70Khz 개발 검토 요청하고 있습니다.

LPD는 기본 85Khz이며, 향후 500cd 개발, ez Green 개발로 갈것으로 되어 있는데 삼성 70khz를 별도로 개발할 필요가 없는 듯 합니다만, Advice 부탁드립니다.

사업부 구매 의견은 현재 85khz(0.13) 500 cd에 대한 가격을 LPD 수준으로 맞추면 추가 물량 협의가 가능한 것으로 Approach했으면 합니다만, 부장님 고견을 부탁드립니다.

감사합니다.

□ 17"고휘도관 관련 ISSUE 사항

-
-
- LG전자 요청사항: 가격 문제로 SDI 제품 물량 확대 어려움.
 - SDI 입장: 현재 LG전자 사용 제품은 17"고휘도관 85khz(임피던스 0.13 mH) 모델(고급 모델),
But, SDI 17"고휘도관 70khz(임피던스 0.18 mH) 모델(일반 모델) 사용하신다면
가격적 부담 줄일 수 있음.
(SDI 요청사항: LG전자 17" Chassis 0.18 mH 모델 개발 요청.)
 - 향후 계획: 17"고휘도관 70khz 에 대한 구체적인 가격부분은 차주 화요일 미팅 시 협의 요청.
-
-

* 15" TILT COIL 관련은 추가 협의 필요.

(유선상 말씀 드렸드시피 엔지니어 Part 확인 결과 및 LPD 가격 관련하여 VE 효과는 어려울 듯
합니다.)
